PROFESSIONAL SUMMARY

Data Analyst with 3+ years of practical experience in data analysis, reporting, dashboard development, and business performance visualization. Turns raw and unstructured data into clear reports and interactive dashboards using Microsoft Excel, Power BI, Power Query, and Google Sheets.

Experienced in data cleaning, transformation, KPI reporting, trend analysis, and performance monitoring. Has built analytical projects covering sales and profitability, airport and port operations, healthcare, payroll, e-commerce, supermarket performance, and market analysis. Focused on accurate, business-oriented analysis that helps organizations understand performance and make better decisions.

CORE SKILLS

Analysis: Data Analysis & Interpretation, Data Cleaning & Transformation, Data Preparation & Structuring, Statistical Analysis, Trend & Performance Analysis, Business Performance Analysis

Reporting: Dashboard Development, KPI Development & Reporting, Data Visualization, Interactive Reports, Report Automation & Optimization

Tools: Microsoft Excel, Power BI, Power Query, Google Sheets

Excel Functions: PivotTables & PivotCharts, XLOOKUP, VLOOKUP, INDEX & MATCH, GETPIVOTDATA

PROFESSIONAL EXPERIENCE

Freelance Data Analyst & Dashboard Developer | 2023 – Present

- Analyze, clean, transform, and organize datasets to prepare them for reporting and decision-making.
- Build interactive dashboards in Excel and Power BI with slicers, filters, PivotTables, charts, and calculated metrics.
- Develop KPI systems to monitor revenue, profit, orders, operations, employees, and customers.
- Use Power Query for data preparation, transformation, and restructuring.
- Build Excel reports with XLOOKUP, VLOOKUP, INDEX & MATCH, and GETPIVOTDATA.
- Analyze trends, performance changes, regional and category performance, and operational indicators.
- Design dashboards with attention to usability, visual hierarchy, accuracy, and business relevance.
- Develop portfolio-based analytical projects across different industries to simulate real business requirements.

SELECTED DATA ANALYTICS PROJECTS
